Date of Report: 2023 03 17

Date of Review: 2023 03 17

Title:

The patient's discoid eczema, which had persisted for the 15 years prior, was repaired after using D A Marine Mineral for a month.

1. Overview:

The patient is 25 years old and has had eczema on her limbs and back of her neck since she was 10 years old. For many years, she has used traditional Chinese medicine and eczema medications (steroids). The eczema on the limbs faded with time and medication, but the eczema on the back of the neck lasted until February 2023.

She began taking D A Marine Mineral drops orally and applying D A Marine Mineral Body Spray externally on February 2, 2023. The eczema on the back of the neck had significantly improved after one month.

Patient's self-report: Eczema has been a problem since childhood and has persisted into adulthood, with the discoid eczema on the back of the neck being the most stubborn. Prior to using DA-Marinemineral, the eczema area would often itch, and I would unconsciously scratch it, resulting in rough and swollen skin. During the period of using the marine mineral, there was no itching, the redness and swelling of the skin disappeared, and the discoid area was significantly reduced in size. The local skin is also in the process of repair.

7. Summary:

Discoid eczema, also known as nummular eczema, is a common skin condition, the cause of which is not yet clear. However, research suggests that discoid eczema is associated with abnormalities in the immune system, which can lead to impaired skin barrier function. Patients with this type of skin problem typically have a deficiency in minerals such as zinc, copper, and magnesium.

DA-Marinemineral, with its natural and rich variety of mineral elements, can improve the body's immune function while continuously repairing the skin affected by eczema. For example, zinc can promote cell division and growth; selenium promotes the metabolism of skin cells, enhancing skin luster and elasticity; and silicon, copper, and other minerals help maintain skin color and texture.
