**Title:**

**D A Marine Mineral: rapid pain relief, anti-Itch, effective inhibition of herpes zoster spread, prevention of postherpetic neuralgia**

## 1. Overview:

The patient is 55 years old and has a history of scoliosis for many years. In February 2020, due to pain near the spine in the lower back, it was initially thought to be sciatica caused by scoliosis. It wasn't until February 8th, when red rash blisters appeared, that it was confirmed as herpes zoster. Despite using D A Marine Mineral Body Spray after the golden treatment period for the first three days of shingles had passed, it played a remarkable role in inhibiting the spread of herpes zoster and relieving pain. Within three weeks, the shingles had healed, and postherpetic neuralgia was prevented.

## 3. Medical History before using D A Marine Mineral:

History of scoliosis for many years.

## 4. User's Complaints and Objective Medical Evidence Before Using D A Marine Mineral:

**User Complaint:** Herpes zoster.

## 5. Description of the patient's use of D A Marine Mineral: (products used, dosage, usage, and execution time):

- Oral D A Marine Mineral Drops: 9 drops/day - morning, noon, and evening, 3 drops each time.
- Topical D A Marine Mineral Body Spray:
  - (1) Waist area: (two-step operation simultaneously) When herpes zoster appears in patches, first use gauze soaked in D A Marine Mineral to wet compress; spray from the navel to the direction of the spine (spray in the opposite direction of the sensory area of the herpes zoster), spray once every 2 hours, and the pain will quickly stop within 15 minutes of spraying when the pain is strong;
  - (2) Eye area: when the eyelids are slightly red, start spraying, and the abnormality on the eyelids disappears within 2 days, and the herpes zoster does not break out around the eyes.

## 6. Comparison results after using D A Marine Mineral:

### Patient statement:

During the process of using D A Marine Mineral to treat herpes zoster, three experiences were particularly obvious:

**First, the effect of relieving pain and itching was very good.**

# Case Report of Users

People who have experienced herpes zoster know that its pain level is higher than that of childbirth. If the pain is divided into 10 levels, this pain can reach 9.8 levels. The high-incidence stage lasts about 4 days, during which covering with a blanket or accidentally touching clothing will be very painful. Therefore, D A Marine Mineral should be sprayed every 1-2 hours, and the pain will quickly stop within 15 minutes of spraying when the pain is strong. I have a very weak tolerance for pain, so I relied entirely on D A Marine Mineral to relieve the pain and did not take any painkillers. In the third week, the area of the herpes zoster had completely healed, leaving only some marks, and itching symptoms began to appear. I continued to spray D A Marine Mineral externally, and the effect of relieving itching was also very obvious.

## **Second, quickly control the spread of the herpes zoster and quickly form scabs.**

Herpes zoster is difficult to diagnose in the early stage. When I was diagnosed, the best golden period had passed. Starting from February 8th, I applied the topical D A Marine Mineral while spraying it externally. Da An Company reminded me to spray it against the direction of the spread of the herpes zoster, which effectively prevented the spread of the rash from the umbilical region to the side waist area, and the rash shrank instantly and quickly formed scabs. This is a very rapid effect that I observed.

## **Third, prevent complications.**

When I found a red spot around my eyes, I started to spray D A Marine Mineral. Within three days, the area around my eyes returned to normal, and there was no rash or postherpetic neuralgia (PHN) or herpes zoster ophthalmicus (HZO).

## 7. Summary:

Herpes zoster is an infectious disease caused by herpes virus infection. Because the infection spreads along the nerves, the pain is severe, and some people even have post-pain sequelae. Mineral elements can play an antiviral role when they act outside the body. At the same time, D A Marine Mineral can effectively alleviate the inflammatory reaction around the nerves and relieve pain due to its ionic and biologically active state.

At the same time, the patient was asked to reversely spray topical D A Marine Mineral from the head of herpes zoster, which is near the navel, which is in line with acupuncture around the head and tail during acupuncture treatment in traditional Chinese medicine, in order to achieve unobstructed Qi and blood, purging fire and detoxification, and dredging internal and external meridians. effect.
